

INFECTIOUS LARYNGOTRACHEITIS (ILT) PRODUCER BIOSECURITY ADVISORY

Municipality of Quinte West in Hastings County

January 26, 2022

The Feather Board Command Centre (FBCC) is issuing a Biosecurity Advisory for [an area in central Quinte West municipality](#) located in Hastings County in central Ontario.

FBCC has been informed by the Ontario Ministry of Agriculture, Food and Rural Affairs (OMAFRA) that a very small mature unregistered poultry flock experiencing chronic respiratory conditions, had tested positive for Infectious Laryngotracheitis (ILT). Two commercial flocks and 56 registered small flocks within a 10 km radius are being advised to enhance on-farm biosecurity and avoid the buffered zone.

ILT is a serious contagious disease caused by a respiratory virus primarily in chickens. Signs to watch out for include increased mortality, noisy breathing, head-shaking, off feed, decreased egg production, inactivity, ruffled feathers and conjunctivitis. **Should you suspect any signs of health concerns in your flock, please contact your veterinarian as well as your Board.** For after hours, call 1-877-SOS-BYRD.

Please reinforce your biosecurity protocols including monitoring the movement of birds, people and equipment on to and off of your premises in the interest of flock health. Please advise any visitors to your premises of your biosecurity protocols because of this situation and keep a logbook of movement in relation to your premises. Minimize visits to other poultry production sites, avoid exchanging equipment with other poultry production sites or ensure that it is washed and disinfected. Ensure all personnel in contact with birds wear clean boots, protective suits, head coverings and gloves/handwashing. Ensure adequate control of vermin and wild birds.

If you have a small flock, you should review OMAFRA's [Update on ILT in Ontario- Understanding the Risks of Infection in Poultry](#).

Further [Biosecurity information](#) for small flock growers is available from the Canadian Food Inspection Agency. We anticipate this advisory to remain in place until early March.

Please consider [registering](#) for access to the FBCC website for detailed information on local and global federally reportable and provincially notifiable poultry diseases. If you wish to subscribe to FBCC Disease Alerts, please [sign up](#).
