

ILT- BIOSECURITY ADVISORY STAND DOWN

Norfolk County

November 12, 2019

On behalf of Ontario's four feather boards, the Feather Board Command Centre is announcing that the ILT Biosecurity Advisory Area, that was established on June 6, 2019 in a 10 km area east of Simcoe in Norfolk, has now been lifted.

The broiler chicken farmer, under veterinary oversight and with support from CFO staff, has been successful in rigorously applying recommended vaccination and clean up protocols. The farm has regained its ILT negative status. No other poultry farms in the risk area have reported health concerns.

Normal biosecurity levels in the area should now be restored.

Thank you for your successful efforts to protect the health of your flocks and the biosecurity of your suppliers, clients and neighbours during this incident.

If you have any concerns regarding the health status of a flock, contact your veterinarian and Board immediately.
