

HEIGHTENED BIOSECURITY STAND DOWN

Lanark County

Re: FARMER NOTIFICATION - ILT DISEASE ADVISORY October 11, 2017

November 21, 2017

On behalf of Ontario's four feather boards, the Feather Board Command Centre wishes to announce that the heightened biosecurity ILT advisory that was issued to poultry farmers and small flock growers in the area north of Hwy 7 in Lanark County on October 11, 2017 has now been lifted.

Normal biosecurity levels can be restored.

Farmers should continue to be very diligent in observing their flocks, monitoring mortalities and tracking feed and water consumption. If you suspect any signs of infectious disease, please contact your veterinarian and board immediately.
