

ILT BIOSECURITY ADVISORY STAND DOWN Perth County

Re: FARMER NOTIFICATION - ILT DISEASE ADVISORY January 17, 2018

February 25, 2018

On behalf of Ontario's four feather boards, the Feather Board Command Centre wishes to announce that the ILT biosecurity advisory that was issued to commercial poultry farmers and small flock growers in a 10K radius area within southwestern Perth County on January 17, 2018, has now been lifted.

Normal biosecurity levels can be restored.

Farmers should continue to be very diligent in observing their flocks, monitoring mortalities and tracking feed and water consumption. If you suspect any signs of infectious disease, please contact your veterinarian and board immediately.
